

# Cruciate ligament examination form

Petinsurance.com.au has a waiting period of 6 months for cruciate ligament conditions, which means that if such a condition develops during this waiting period (or was pre-existing at the policy commencement date), your policy will not cover cruciate ligament conditions. This waiting period may be waived depending on the results of a veterinary examination of your pet (at your expense).

**To apply for this waiting period to be waived:**

- Your vet must examine your pet and complete and sign this form;
- the completed and signed form must be received within 14 days of the examination date.

## 1. Your details

Petinsurance.com.au policy number

First name

Address

Surname

State

Postcode

Initial

Title

Other

## 2. Pet details (one form to be completed per insured pet)

Name

Dog

Date of birth

Male

Female

Breed

Cat

Additional notes:

## Important

You will receive written confirmation from us in the event that the waiting period for cruciate ligament conditions in respect of your pet is reduced. Unless you receive such written notification, the waiting period in respect to the pet identified on this form remains at 6 months for cruciate ligament conditions starting from the policy commencement date.

The Vet (the scary person with the thermometer) to complete sections overleaf

## Person who looks after me when I'm sick to fill in

### 3. To be completed by vet

#### Veterinarian instructions:

Please physically examine the pet as indicated. (No other diagnostic tests are required). Please tick YES or NO as best describes your findings, and add further details in the NOTES section at the end of the form. Please keep detailed notes in this pet's clinical records.

Owner's surname

Pet's name

Date of examination

#### Owner history

Has the owner ever reported a history of limping, or difficulty arising? (If YES please provide a copy of the clinical records)

Yes  No

#### Clinical observation - observe the pet walking, trotting, and arising from a seated position

Were there observable signs of clinical lameness?

Yes  No

#### Clinical examination - the clinical examination is performed without sedation or anaesthetic

Joint laxity - is there laxity in the knee joint? Detected by:

Positive Cranial Drawer Test
